

# GreenFire DAO White Paper

## Gold Backed Blockchain Application

### GreenFire DAO

#### **Purpose**

The purpose of this proposal is to introduce the Green Fire DAO, the Cryptocurrency and the advanced Blockchain applications of the “Landfill” economy.

As a DAO, a decentralized autonomous organization, Green Fire DAO presents a new organizational structure and model of consensus management and interoperability both within our own Green Fire Landfill networks as well as global ecommerce networks within the framework of blockchain technology.

To initiate the Green Fire DAO Initial investors created a Foundation, The Green Fire DAO Foundation.

#### **GreenFire DAO Foundation Legal Disclaimer**

Please read the following notice carefully before proceeding to read this Whitepaper document issued by GreenFire DAO Foundation, an exempted company incorporated and existing under the laws of the Panama (hereinafter – “Distributor”). This notice applies to all persons who read this document. Please note this notice may be altered or updated.

The Whitepaper does not constitute any relations between you (hereinafter – “you” or “Holder”) and the Distributor. Acquiring of the GGC tokens is available only after accepting the Terms of GGC T&C (hereinafter – “T&C”).

Acquisition of GGC cryptographic tokens does not present an exchange of cryptocurrencies for any form of ordinary shares of the Distributor and a Holder of GGC cryptographic tokens is not entitled to any guaranteed form of dividend, Holders of GGC tokens are only entitled to certain rights within the T&C.

GGC tokens are not intended to constitute securities in any jurisdiction. This Whitepaper does not constitute a prospectus or offer document of any sort, and is not intended to constitute an offer of securities or a solicitation for investments in securities in any jurisdiction.

This Whitepaper is for information purposes only. The contents of this Whitepaper are not a financial promotion. Therefore, none of the contents of this Whitepaper serves as an invitation or inducement to engage in any sort of investment activity.

Prospective acquirers of GGC tokens should carefully consider and evaluate all risks and uncertainties associated with the cryptocurrencies, GreenFire DAO Foundation and their respective businesses and

operations, the GGC tokens and the GGC Initial Coin Offering. Familiarize yourself with all the information set out in this Whitepaper, Risk Notice and the T&C prior to any purchase of GGC tokens.

Ensure that you are aware of all of the would be risks prior to obtaining GGC. The Risk Statement details all potential risks that you should consider. We recommend that you seek out independent financial advice before engaging in any sort of business endeavor.

### **ICO GreenFire DAO Foundation White paper Risk Statement**

No regulatory authority has examined or approved any of the information set out in this Whitepaper. No such action has been or will be taken under the laws, regulatory requirements or rules of any jurisdiction. The publication, distribution or dissemination of this Whitepaper does not imply that the applicable laws, regulatory requirements, or rules have been complied.

To the maximum extent permitted by the applicable laws, regulations and rules, GreenFire DAO Foundation and its affiliates and their respective officers, employees or agents will, in relation to the website and GGC tokens, not be liable for any damages of any kind, including, but not limited to, direct, consequential, incidental, special or indirect damages (including but not limited to lost profits, loss of revenue or third party loss whether foreseeable or otherwise, trading losses or damages that result from use or loss of use of the website and GGC Tokens).

For the avoidance of doubt, The Distributor expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained in this document, (ii) any error, omission or inaccuracy in any such information, (iii) any action resulting therefrom, or (iv) usage or acquisition of products, available through the website.

You acknowledge and agree that you are not purchasing GGC tokens for purposes of investment, speculation, as some type of arbitrage strategy, for immediate resale or other financial purposes.

Some of the statements in the Whitepaper include forward-looking statements which reflect the Distributor's current views with respect to execution roadmap, financial performance, business strategy and future plans, both with respect to the Distributor and the sectors and industries in which the Distributor operates.

Statements which include the words "expects", "plans", "believes", "projects", "anticipates", "will", "aims", "may", "would", "could", "continue" and similar statements are of a future or forward-looking nature. All forward-looking statements address matters that involve risks and uncertainties.

Accordingly, there are or will be important factors that could cause the Distributor's actual results to differ materially from those indicated in these statements. These factors include but are not limited to those described in the part of the T&C entitled "Risks", which should be read in conjunction with the other cautionary statements that are included in the T&C.

Any forward-looking statements in the Whitepaper reflect the Distributor's current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to the Distributor's operations, results of operations and growth strategy.

These forward-looking statements speak only as of the date of the Whitepaper. Prospective buyers of the GGC tokens should specifically consider the factors identified in the Whitepaper and T&C which could cause actual results to differ before making a purchase decision.

No statement in the Whitepaper is intended as a profit forecast and no statement in the Whitepaper should be interpreted to mean that the earnings of the Distributor for the current or future years would be as may be implied in this Whitepaper.

ICO GreenFire DAO Foundation White paper 02 results to differ materially from those indicated in these statements. These factors include but are not limited to those described in the part of the T&C entitled "Risks", which should be read in conjunction with the other cautionary statements that are included in the T&C.

Any forward-looking statements in the Whitepaper reflect the Distributor's current views with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to the Distributor's operations, results of operations and growth strategy.

These forward-looking statements speak only as of the date of the Whitepaper. Prospective buyers of the GGC tokens should specifically consider the factors identified in the Whitepaper and T&C which could cause actual results to differ before making a purchase decision. No statement in the Whitepaper is intended as a profit forecast and no statement in the Whitepaper should be interpreted to mean that the earnings of the Distributor for the current or future years would be as may be implied in this Whitepaper.

*Citizens, residents (tax or otherwise), or green card holders, of the United States of America are ineligible to purchase any GGC tokens in the GGC Initial Coin Offering (as referred in this Whitepaper). The same pertains for residents of the Republic of Singapore and Canada. Participation in the GGC Initial Coin Offering for: This Whitepaper, or any part thereof, as well as any copies, must not be taken or transmitted to any country where distribution or dissemination of this Whitepaper is prohibited or restricted.*

## **What is the GreenFire DAO Foundation?**

The Green Fire DAO Foundation is a group of early adopters of the Green Fire DAO platform who share the belief that the Green Fire DAO and its technology has the potential to revolutionize how waste reclamation is done and how reclamation, specifically Landfill Reclamation, can provide a financial backbone for global decentralized commerce.

The GreenFire DAO founders have invested the initial assets into the GreenFire DAO Gold Reserve Bank.

## **Why Is The Green Fire DAO Foundation Needed?**

The Foundation is an organization of the initial asset contributing entities whose main role is to hold on to assets and use the DAO voting system to establish asset value and manage the coin distribution.

In order for the Green Fire platform to grow and gain widespread adoption, a bridge is needed between the Green Fire platform, community, developers, etc. and the rest of the world who are accustomed to the old world legacy banking system to connect with the new world organism of decentralized asset backed currencies, as designed by Green Fire, that are not owned by any government or central bank.

Green Fire will continue to grow in utility (daily practical applications) and thrive, this will be achieved by the addition of the landfill Pickers (about 15 million) and Women Informal Workers (about 20 million) and more and more people simply joining Green Fire.

To grow the Green Fire platform and community, Green Fire has something that can connect and engage with the rest of the world (individuals and businesses) at a professional, hospitable, safe and secure manner.

The Green Fire DAO Foundation can simply be viewed as an interface between an old and new financial world guided by the Green Fire community and NOT directing the Green Fire community.

The Green Fire community does not need a ‘foundation’ for the community, it needs a ‘foundation’ for the rest of the world to be able to connect with the value that Green Fire and its community offers.

### **A Green Fire Cryptocurrency Backed By Gold and Other Assets Tangible and Intangible.**

These assets are registered as Green Fire DAO Reserve Assets in the Green Fire DAO Gold Reserve Bank.

### **What is The Green Fire Gold Reserve Bank?**

**The GreenFire DAO Gold Reserve Bank** is the controller and the issuer of **Global Gold Concerns (GGC)** cloins.

**The GreenFire DAO Gold Reserve Bank** is the depository of all Green Fire DAO assets. This DAO bank will have a corresponding relationship with additional DAO-based banks for other financial functions and services not performed by GreenFire Reserve Bank.

**The GreenFire DAO Gold Reserve Bank** will be the only Global Gold Concerns (GGC) blockchain miner and will issue every Informal Worker or Landfill Picker on our projects a private key for trade transactions. Please see “[An Economic Plan For The Children of the Landfill](#)” for the concept explained.

**The Green Fire Gold Reserve Bank Founding Assets** – An ASSURANCE Smart Contract defining the asset allocation backing every Global Gold Concerns (GGC) as at a fixed ratio of 1 to 1 in value. We are currently using the metric of the \$1 USD to \$1 USD in value. This metric may be subject to change at any time.

This smart contract will be the Prime GreenFire DAO Gold Reserve Bank smart contract and will be the basis of all Global Gold Concerns (GGC) issuance.

### **Universal Payment System**

The Universal Currency/Asset Wallet application offered by Ethereum blockchain and incorporated in GreenFire DAO Global Gold Concerns (GGC) is totally unique to the crypto technology industry.

Through the use of one user friendly wallet, owners will be able to trade and interact with any other blockchain, cryptocurrency, fiat currency, and other electronic payment systems from one platform.

# **The GreenFire DAO ICO**

## **The GGC Offer**

**Blockchain Startup Green Fire Engineered Reclamation to Launch Initial Coin Offering (ICO) To Raise Funds for GreenFire DAO Landfill Projects and the “Children of the Landfill”**

**Cryptocurrency developers have their coin as their business, the GreenFire DAO is a business-on-the-blockchain and has a coin, the Global Gold Concerns (GGC), for its business transactions.**

**Our Decentralized Autonomous Company (DAC) business is Landfill Mining and Reclamation.**

**The GreenFire DAO trade currency is the Global Gold Concerns GGC coin**

**All purchases of GGC are transacted in Bitcoin.**

Green Fire Engineered Reclamation’s global team of engineers and professionals and their leading Blockchain developers is launching an Initial Coin Offering (ICO) for Global Gold Concerns (GGC) to raise investment funds for the Green Fire Engineered Reclamation Landfill projects and the “Children of the Landfill” humanitarian Project. The project will be developed on the Ethereum blockchain and be established as the GreenFire DAO.

As a DAO, a decentralized autonomous organization, GreenFire presents a new organizational structure and business model of consensus management for the reclamation business and Landfill Technology

### **ICO DETAILS**

#### **GreenFire DAO ICO**

- The Initial Coin Offering (ICO) of Global Gold Concerns (GGC) is 1,000,000,000 (one billion) coins.
- The base value of one (1) GGC Token is denominated in USD and is valued at \$1.00.

#### **Initial Assets held by the Green Fire Foundation:**

**From contracted operating mines.**

10,000,000 grams of gold. Estimated value, \$500,000,000 USD.

From Cryptocurrencies \$250,000,000 (NLA)

From Asset accounts (FTAsset) \$500,000,000

**Total initial assets on deposit are valued at USD1,250,000,000 (One billion two Hundred and fifty Million US Dollars)**

These assets are deposited and held in the GreenFire DAO Gold Reserve Bank.

#### **Global Gold Concerns Coin Assets**

**<https://globalgoldconcerns.com>** is the host of the ICO for GGC, a gold and asset backed cryptocurrency, developed on the Ethereum blockchain.

GGC is a reclamation coin.

GGC ICO projected price is \$1.00

GGC is backed with hard assets from:

1. The precious metals reclaimed from the Landfill Reclamation activities

Precious Metals

Rare Earth Metals

Carbon

All non ferrous metals recovered will be sold and precious metals will be acquired with proceeds

2. Precious metals reclaimed from mine tailings

3. Gold from contracted Gold Mines.

4. Real Estate

The Landfills that maybe purchased

The recovered land after waste removal

GreenFire Projects, hospitals, schools etc

5. Cash from Donor asset fund (FTAsset Management)

6. A portfolio of Cryptocurrencies: NLA, bitcoin, bitcoincash, litecoin, ...

**Note:** Our policy is to purchase whatever is necessary to maintain our ratio and hedge.

The approximate ratio of these assets that is established and maintained is as follows:

Metals, groups 1, 2 and 3, – 40%

Real Estate, group – 40%

Cryptocurrencies – 20%

The “value” of GreenFire DAO assets are set initially by the GreenFire DAO Foundation.

GGC is a hedged and balanced cryptocurrency investment.

GGC is a hedged and balanced cryptocurrency investment.

### **ICO GGC Coin Structure**

Total GGC Issuance is 1,000,000,000 (one billion) coins

Total GGC coin reserves is 500,000,000, held by the GreenFire Foundation

Total GGC ICO issuance is 500,000,000

Founders – 5% (investor in Foundation)

Admin – 5%

PR – 3%

Other - 2%

Total for sale during ICO – 100,000,000 coins

Current GGC coin value is \$12.50USD (\$1,250,000,000/100,000,000)

**ICO sale price \$1.00 per coin**

### **Investors In The GreenFire Foundation**

Early investors in the GreenFire DAO will receive a share of the 5% distribution of the GGC coins based on their stake.

The GreenFire Reserve Assets are used exclusively to back Global Gold Concerns (GGC) Token and the GreenFire DAO asset exchange. As the assets are accepted more Global Gold Concerns (GGC) tokens are issued.

The Global Gold Concerns (GGC) Token is a Global Transaction Currency designed to provide a complete venue of financial services through secured transactions internationally and without interacting with traditional banking processes. Global Gold Concerns (GGC) Token transcends all borders and ideologies.

The mission of Global Gold Concerns (GGC) is to provide a secure global asset backed digital currency for international exchange.

### **About the Landfill Reclamation Business**

#### **Landfill DAC**

Each landfill project is structured as a decentralized autonomous corporation (DAC), a GreenFire DAO entity that performs the functions of a separate company (e.g., payroll, issuing dividends).

Each Green Fire landfill project, once evaluated, may be issued its own unique “colored” coin that will be identified with a specific project. These “Project” coin may be offered as a separate investment vehicle with dividends paid to the coin holders.

#### **Landfill Project Funding – Coins with Dividends**

All landfill projects may have unique “project coins”. They will be issued with the same backing.

**A project assurance smart contract** is a contract in which investments are held until the amount reaches a designated threshold or beyond, after which point the project is initialized and new “colored” Global Gold Concerns (GGC) are released. The contract further addresses the project production threshold that when reached, dividends are paid to the original investors in the project colored coin.

Each Landfill Project, as a node on the DAO, will collect transaction fees and mining rewards these will contribute to the investor dividend and to the “Children of the Landfill”.

Once the contract is created and operational, the colored Global Gold Concerns (GGC) token holders can sell their tokens at current market rate, hold it to speculate on the platform becoming more popular relative to the fixed number of colored tokens, or exchange their colored token with the GreenFire DAO exchange itself for Global Gold Concerns (GGC) token as described above.

The color or type or size of token is irrelevant as it is merely a representation of an agreed upon completed condition.

### **Landfill Assets**

The Green Fire Engineered Reclamation process extracts gold from the landfill waste using our own patented “green” processes, our processes never pollute or contaminate. We view Landfill gold as an environmentally safe gold. It is this “Green Gold” that is literally **mined** with a non-polluting process that is exclusively targeted as the asset backing the GreenFire DAO Token, the Global Gold Concerns (GGC).

All reclaimed precious metals and minerals are registered and added to the asset base of Global Gold Concerns (GGC) Token. Every Green Fire Engineered Reclamation landfill project adds to the Global Gold Concerns (GGC) asset base and so, allows **The GreenFire DAO Gold Reserve Bank** to issue more Global Gold Concerns (GGC) tokens.

### **Landfill Economy**

The GreenFire DAO and Global Gold Concerns (GGC) Token was invented to supply a new and more secure means for international trade and commerce for the Landfill Reclamation and “Children of the Landfill” projects.

As a basis for education and commerce, each Landfill Project has a 3D print manufacturing operation producing consumer products for the villages. The “Children” will be educated using the STEM system.

As each of these 3D Print Manufacturing installations mature, they will be added to the distributed GreenFire DAO manufacturing network. This will add distributed manufacturing to their economic sustainability.

GreenFire DAO supplies secure needed financial services to the invisible workers of the world, the poorest of the poor, the Children of the Landfill, the Informal Workers and the orphanages of the world.

GreenFire DAO distributed ecommerce platforms supply quick secure transaction processing with complete anonymity.

GreenFire DAO intends to construct a global network of distributed exchange centers locating each center on a Landfill Project.

GreenFire DAO will establish itself as a provider of independent secure banking and anonymous P2P transactions between the Landfill communities , and then globally as the Green Fire Landfill 3D distributed manufacturing and production grows and spreads.

### **Landfill Commerce Transaction?**

A GreenFire DAO **ecommerce** transaction is the sale or purchase of GreenFire DAO goods or services, whether between businesses, households, individuals, governments, and other public or private organizations, conducted over the GreenFire DAO.

The goods and services are ordered over the Internet, but the payment and the ultimate delivery of the goods or services will be conducted through smart contracts directing the transaction.

All transactions are private and anonymous to all but the signatories on the transaction smart contract. Every signatory to a smart contract receives a “block-chain” receipt for every transaction based on the transaction smart contract.

### **The GreenFire DAO Network**

The GreenFire DAO network of federated servers is made up of the servers that exist as part of the Green Fire landfill installations. Every installation has a 3D print manufacturing center, each of these centers are a node on the GreenFire Network.

All transactions are processed through this network. A transaction is passed through several servers simultaneously becoming virtually invisible and unavailable to any other than those that are part of the transaction.

The Green Fire network of servers will be added to the Ethereum blockchain network.

### **Governance and Elections**

The GreenFire DAO has a fully democratic elected Board of Directors. The Board will be elected annually after Startup stage by weighted voting by all members.

The key aims of the GreenFire DAO organization are to provide advanced global blockchain financial solutions and applications and decentralized cryptocurrency capable of real-time transactions and providing banking services to the previously “unbankable” citizens of the world, the Children of the Landfill.

### **The problem of third party risk.**

There are no third parties involved with Global Gold Concerns (GGC). We are completely transparent about our assets, this is addressed through Smart Contracts. We make sure that you know that we have the asset we are using to back Global Gold Concerns (GGC) digital currency.

### **What Is The Financial Structure of Global Gold Concerns (GGC) Coin?**

The financial structure is very straight forward. Global Gold Concerns (GGC) Coin is a common cryptocurrency stabilized by identified assets, gold and other. The Green Fire Gold is the gold that is reclaimed from the Landfill/Mining Reclamation processes.

### **Is The Global Gold Concerns (GGC) Coin a Currency?**

Global Gold Concerns (GGC) Is Real Money?

In the functional sense, yes; Global Gold Concerns (GGC) is being used as a medium of exchange. In another sense, though, it is something entirely new in the evolution of money. The Global Gold Concerns (GGC) wallet will interact with any cryptocurrency on the blockchain and fiat currencies.

### **Are Global Gold Concerns (GGC) Tokens really worth anything?**

Most digital currencies are fiat and are worth whatever individuals choose to believe they are worth. Global Gold Concerns (GGC) Coin has a recognizable value.

The value of the Global Gold Concerns (GGC) Coin is initially determined by the “asset value” in the GreenFire DAO Gold Reserve Bank, however, as GreenFire DAO advances other assets may be registered and be presented to the GreenFire DAO for consensus on the value. Once consensus is reached the value established is used to back the Global Gold Concerns (GGC) Coin.

**Global Gold Concerns (GGC) Coin has exciting newness, high-tech nature with asset backing.**

This exciting newness comes from the Global Gold Concerns (GGC) Wallet's ability to transact with any other cryptocurrency on the blockchain as well as fiat currency.

Global Gold Concerns (GGC) is highly valued because of the asset backing, privacy, convenience, superior portability (instantly transferable to any point on the globe with Internet access, independent from central banks and intrusive governments).

Global Gold Concerns (GGC) Coin as a true gold and real asset backed currency, is rare, there are few cryptocurrency that are "asset backed" with certifiable and provable mineral, real estate assets and reclaimed metals form waste.

The confidence in the Global Gold Concerns (GGC) Coin and the public opinions of Global Gold Concerns (GGC) Coin are derived from its tangible and unlimited asset backing.

The primary function of Global Gold Concerns (GGC) is to provide a medium of exchange for many opportunities both internal and external such as the Green Fire 3D Distributed Manufacturing Network.

### **What is the Public Business Model for Global Gold Concerns (GGC)?**

#### **Global Gold Concerns (GGC) Global Transactions and the GreenFire DAO Smart Contract**

Our innovation is to express an issued instrument, the Global Gold Concerns (GGC) Coin, as a smart contract, and to link that smart contract into every aspect of the transaction payment system. This document, the Global Gold Concerns (GGC) Smart Contract, forms the basis for understanding an issue and every transaction within that issue.

By this process, a document of some broad utility (readable by user and program) is drafted and digitally signed by the issuer of the instrument.

By extension, all issues of value, such as currencies, land, commodities, loyalty systems and vouchers, benefits from this approach.

As an issuer of asset backed currency GreenFire DAO accommodates global transaction and payment processing. Our method is to identify and describe issues of financial transactions as smart contracts.

This is the key functionality of Global Gold Concerns (GGC).

A Global Gold Concerns (GGC) smart contract can be defined as a single document that is:

- a) a contract offered by an issuer to holders,
- b) a valuable right held by holders, and managed by the issuer,
- c) easily readable by people (like a contract on paper),
- d) readable by programs (parsable like a database),
- e) digitally signed,
- f) able to carry the keys and server information, and
- g) allied with a unique and secure identifier.

In the simplest possible terms, a Global Gold Concerns (GGC) Smart Contract is a document defining a type of value for issuance over the Internet. It identifies the Issuer, being the signatory, and any terms and clauses the Issuer sees fit to add in to make the document stand as a contract.

All communications regarding transactions within the GreenFire DAO environment are only transmitted to other Global Gold Concerns (GGC) wallet holders for security reasons and in every instance GreenFire DAO provides encrypted email services.

### **Compliance**

There will always be a dispute-mediation clause regarding independent arbitration if all else fails. By “all else fails,” It means in most smart contracts there will be a time-based trigger: if neither party agrees to the contracted actions by a specific time in the contract located on the ledger, the contract is sent to arbitration.

An Arbitrator may be chosen from a list of known reputable arbiters who face similar market conditions to provide unbiased service. These types of default-based relationships and contractual stipulations take place today.

### **Smart Contract Conclusion**

The smart contract is the keystone of the Global Gold Concerns (GGC) DAO issuance. Our innovation is to express all the salient details of an issuance as an unforgeable contract, unforgeably linked into every action within a payment system. In this way, a financial transaction can develop along the lines it always has done - by means of agreement within smart contracts.

By translating the institution of the smart contract into the digital domain, we build upon centuries' and even millenia worth of experience in documenting, sharing and disputing the meaning of agreements between parties.

### **Asset Stabilization**

Global Gold Concerns (GGC) increases and stabilizes its circulation through use of an expanding asset base, including Green Fire Landfill projects and other appropriate assets.

GGC is a hedged and balanced cryptocurrency investment.

### **GreenFire DAO Business**

Where does the money go from the sale of Global Gold Concerns (GGC) Coins?

All monies received are a tool for developing the new global business model based on the “Landfill Economy”. (See “[An Economic Plan For The Children of the Landfill](#)”)

### **The GreenFire DAO Smart Contract**

The smart contract is addressed in some detail, explaining the functionality and the purposes of this essential legal instrument of every transaction performed with the use of Global Gold Concerns (GGC) Token.

Global Gold Concerns (GGC) is built as Distributed Autonomous Organization (DAO) created on the Ethereum blockchain. Decentralized applications and so called “smart contracts” are the tools to make GreenFire DAO fully decentralized, without any single point of failure. This network can't be taken down or hijacked due to this design.

## ***The Global Gold Concerns (GGC) DAO Basic Functions***

### **Global Gold Concerns (GGC) Functionality**

#### **Basic**

Token Transfer  
e-Governance  
Digital Asset Exchange  
Encrypted Messages  
Multisignatures  
Account Control  
Anonymous Transactions

### **Infrastructure**

Decentralized Name Registrar  
Decentralized Marketplace  
Distributed File Storage  
Decentralized Crowdfunding  
Decentralized Hosting

### **Financial**

Sub Currency System  
Nanopayments / Microservices  
Reputation System  
Secured Cryptocurrency Bank  
Prediction Market  
Decentralized Exchange  
Smart Contracts

## ***We Are Green Fire DAO***

The market needs a trustworthy and legitimate on-the-ground decentralized blockchain application to support the environmental reclamation needs of this world and be supported by an asset backed cryptocurrency that can lead to positive change.

As a gold-backed currency with inner humanitarian value, GreenFire DAO poses an international and unaffiliated alternative to existing reclamation solutions.

The result of careful planning and preparation, Global Gold Concerns (GGC) is designed to be reliable and trade-able asset backed cryptocurrency .

Global Gold Concerns (GGC) is committed to ensuring that all operations - such as customer service and the currency management mechanism - will operate under the principles of simplicity, transparency, and fairness. We need your cooperation in spreading the word and supporting Green Fire Gold.

**A small investment will go a long way in leading to positive global change!**

## The Members of GreenFire DAO Foundation

The members of the Foundation are early investors and members of the Advisory Board of the GreenFire Foundation and The GreenFire DAO Gold Reserve Bank.

### Michel Prettyman, CEO GreenFire Engineered Reclamation

#### Professional Profile

#### Key Roles:

Director/Designer  
Publisher  
Project Manager

#### Background:

I am a technologist and a humanitarian, I love creating solutions for the poor of the world. My goal is to have you saying “Mike, you are doing amazing things for Landfill Reclamation and the Landfill Workers, “The Children of

the Landfill.”

I am an information professional, researcher, writer, designer, inventor and philosopher.

I started my career in the Navy as a Data Processing Tech in 1967 and spent the next 50 years practicing.

My mission is to create opportunity for these people - the poorest of the poor.

Retired information management and information systems professional

BS Computer Programming and Electronics. Applications Specialist and software expert focus Facilities Management/Infrastructure Management.

I have over 50 years in the field of computer applications and with degrees in Computer Programming and Electronics. I have experience in operations, field engineering, programming, and project management. Applied applications in Information Engineering, data integration and Facilities Management. Clients including IBM and the US Navy

Currently, I am the Chief Executive Officer (CIO) for Green Fire Engineered Reclamation and the GreenFire DAO. The business is Landfill Mining and Reclamation..

I am the Campaign Manager for an in-bound crowd funding ICO project.

I practice the art of entrepreneurship and social marketing.

I am dedicated to helping the “Children of the Landfill”,

I am seeking interested people who want to reclaim the wealth from landfill Reclamation projects and help humanity, please contact me via email: [michel@unseen.is](mailto:michel@unseen.is), If you are interested in more information.

### **Stephen Hodgkiss, GreenFire Chief Engineer**

My current role as Chief Engineer of blockchain development gives me little time for a social life at present; but this has benefits.

I am passionate with what I do and if you are passionate then people notice that.

I am also a Founding Limited Partner of many companies that have successfully developed and are offering new and original blockchain applications and the most advanced suite of Inbound Marketing tools that incorporates an amazing evolutionary superior Social "Neural" Network.

### **Jan Jaap van der Most, CEO FTAsset Management**

Mr. van der Most has over 10 years international banking experience and over 25 years entrepreneur experience.

He has a team of about 25 seasoned people bank and business people around him to keep him accountable and to steer the organization.

No decision is taken aken alone and responsibilities are shared; but this ship has one captain.

### **JA (Jim) Devine, Funding Manager**

James has over 30 years of business experience across a broad range of technical, operational, management and entrepreneurial endeavors. Over the past 20 years, he has been a licensed Delaware commercial and residential realtor with a focus on land and real estate development. His extensive experience in structuring and funding projects in the commercial, residential and raw land arenas coupled with his understanding of construction and development processes will provide strategic input and guidance for the development of Buy/Sell opportunities. As a successful entrepreneur, Mr. Devine brings a wealth of knowledge and practical experience to the position of Project Advisor.

## Noel Adams, CEO, Next Level Africa

The Founder and CEO of Next Level Africa (NLA) Is a seasoned and professional business man who has been involved in traditional business and more recently in on-line ventures.

With over 40 years in business with many successful projects under his belt, he has amassed a strong team specializing in different attributes that make any concept that we acquire to be developed and launched.

He has a strong moral sense and the right values. He believes in helping others and in doing so helping himself achieve more.
